01

CHOOSE THE SITE

Every Auroma home begins with land wrapped in 360° greenery, clean air (AQI below 50) and the calm of Auroville.

02

SHAPE IT WITH THE CLIMATE

Orientation, cross-ventilation, daylight and Vaastu are designed together — so the house cools, lights and breathes itself.

03

BUILD WITH NATURE

Eco-friendly bricks, stone, earth and lime — natural, breathable materials chosen for your health as much as for beauty.

04

CLOSE THE LOOPS

Sun, rain and kitchen waste become energy, water and soil. A home that gives back more than it takes.

AUROMA PHASE 4 HOMEOWNER

“Ecology and value creation have always been central to my vision. What I value about Trupti Doshi is her ability to beautifully intertwine ecology and architecture creating homes that coexist with the land, water and migratory birdlife rather than disrupting them. Her ability to bring coherence between land, building and construction is extraordinary.”
